

Ruwudu - Announcement

We are pleased to release version 3.000 of the Ruwudu font family. The font package is available for download from the [Download page](#).

Four weights for this typeface family are included:

- Lateef Regular
- Lateef Medium
- Lateef SemiBold
- Lateef Bold

The full range of weights is accessed in different ways depending on the application. See the [FAQ](#) for details.

Changes

2023-02-xx (WSTech team) Ruwudu Version 3.000

New

- Added 3 weights — Medium, SemiBold, and Bold
- Added OpenType language support for Hausa
- Added characters: U+0870, U+0872, U+0874

Improved

- Updated space characters to match industry standards (emspace, enspace, etc.)

Both desktop and web fonts are provided in a single, all-platforms package on the [Download Page](#).

Known issues

Because we reduced the line spacing for this font, there is the possibility of interline collisions which might require manual intervention. This would be most likely to occur in languages which use multiple jeem-like characters sequentially in one word. In this case, turning off the stacking behaviour of jeem-like characters (ss07) for one word could fix the interline collision.
