Ruwudu - Documentation

Thank you for your interest in the Ruwudu font. Ruwudu supports the characters known to be used by languages written with the Kano style of Arabic script, but may not have the characters needed for other languages.

This documentation is a set of HTML pages that can be viewed in any modern web browser. PDF versions of these pages are also provided. This content, plus download links and a contact form, are available from the Ruwudu site.

- About — Information about this project and SIL International
- Resources — Help with installation and use
- FAQ — Common questions and answers
- Design — History and background of the design
- Character set support — Details of Unicode characters that are supported
- Type Sample — Type sample demonstrating all the characters in this font
- Font features — Using smart font features
- Rendering the Allah ligature — Special rules for rendering the Allah ligature
- Support — How to get additional support
- Developer information — How to modify and build the fonts
- Versions - Sources for alternate versions
- Version history - Complete version history
- Announcement - Source for News announcement

Additional information is also provided in other project files: README.txt, OFL.txt, OFL-FAQ.txt, and FONTLOG.txt.
